CROWN POINT

A City of Homes, Churches and Schools

Crown Point is often called the Hub city of Lake county. Located in the central part of the county on the watershed between the St. Lawrence and Mississippi River systems, it is known as a very healthful city. Solon Robinson, its founder, stressed this point when making his appeal to the commissioners appointed by the state legislature to relocate the county seat.

Two railroads and four bus lines afford good transportation to the industrial cities to the north and to Cedar Lake, the summer resort to the south. A large airport is situated one-half mile north of city limits.

Education for the children is provided by four public schools and two parochial schools. These schools are manned by an efficient corps of teachers.

Churches of 12 of the leading denominations provide spiritual leadership in the community.

Recreation is available at two golf courses, two bowling alleys, and the county fairground park with its forest and its natural amphitheater around beautiful Fancher Lake. Four well-equipped playgrounds, with supervised play in the summertime, have been established for benefit of the children.

Crown Point has an excellent supply of water from deep wells. The streets of Crown Point are lighted by the municipal light plant. One of the regional utility companies provides excellent gas and electric service to the local consumers.

The population of Crown Point is approximately 6,000.

Compliments of

The Knight Insurance Company

214 East Joliet Street, Crown Point, Indiana

"Where Insurance Is a Business"

Established in 1907, this agency is proud of the "Certificate of Appreciation" presented in 1942 by The Pennsylvania Fire Insurance Co. "In recognition of more than 35 years of continuous and loyal service by the Knight family as our local representatives". At that time insurance was usually a side line, the first policies being much different from today's, and much more restricted. The forms were written in long hand on thin semi-transparent paper. Shortly after this each company had its own printed forms. It was necessary to attach permits for gasoline lights, gasoline or kerosene to be used for cooking, acetylene lights, electric lights, fire works, and special forms for most lines of business.

Tornado insurance, uncommon at the time, was written under a separate policy with separate forms. "Builders Risk" forms provided "that all shavings be removed once every week, and no smoking be allowed on the premises." As indicating the principal items to cover at the time, the "Drug Store Form" covered - - drugs, chemicals, patent medicines, paints, oils, glass, wines, liquors, druggists sundries, notions - - counters, shelving, scales, drawers, prescription case, show cases, desks, safe, letter press and typewriters, if any." The 1911 form covered "soda fountain and appurtenances complete", with permission "to keep not exceeding 5 barrels of kerosene, not to be handled or sold by artificial light within a distance of 15 feet. Also, "not to exceed in all 10 gallons of benzine, benzole, gasoline, naptha, and like products, to be kept in closed metal or glass receptacles, free from leaks, and to be handled and sold by daylight only". Permission given to keep small quantities of phosphorus, saltpeter and such other merchandise as is usual to a retail drug store". The "Lumber Yard form" covered lumber, lath, shingles, pickets, posts, timber, sash, doors, blinds, battens, mouldings, lime, plaster, hair, coal, wire, paints, building paper and other merchandise not more hazardous" - - "sheds, office and warehouse buildings, furniture, scales, tools, wagons, horses, narness, and feed." Interesting in its language and coverage is a copy of a policy which we have, issued by one of our companies in 1817 on the Mount Vernon property of Washington.

When, 25 years ago, this agency became a full time "insurance only" agency, there were only two exclusive insurance agencies in Crown Point. One of these, the Backe agency was purchased in 1924, and several smaller ones since, so that today the Knight agency is not only one of the largest in southern Lake County, but also unique in the strength of its company representation, representing The Aetna and The Travelers, two of the largest Life and Casualty companies in the country, along with the three largest and 10 other leading fire companies.

Consequently this agency has ample facilities to handle any desirable line of insurance.

In 1946, after returning from service in World War II and attending the Travelers school of insurance in Hartford, James E. Knight became associated with the agency and has already extended its service in many ways. We thank our many friends whose patronage has built this agency, and promise a constant effort to provide the best insurance service possible, representing the largest and strongest American companies. In 1934 our present location just east of the Post Office was established in a building purchased together with Edwin F. Knight, attorney.

In recognition of over 25 years of full time insurance agency service, we present herewith a map and guide of our fair city, hoping it will be found helpful by many.

Street Numbering System of Crown Point

Clark St. running E. from the NW cor. of the Public Square and Joliet St., running NW from the W. side of the Public Square, and Main St. running N. & S. on the E. side of the square from the BASE LINES from which all building numbers start and street indications as N., S., E., or W. are indicated. Numbers begin with 100 at these base lines (1 at Joliet & Court Sts.,) and run uniformly from them in the direction indicated toward the city limits; the even numbers on the N. & E. sides, and the odd numbers on the S. & W. A number is allowed for each 25 ft. and in long blocks numbers jump at places where parallel streets have intersections.

INDEX TO STREETS

Anderson St. runs E & W at 800N from 100-300W & 200-900E.
